To reinforce the team in Liège, we are actively looking for a (m/f):

Front-end Developer

Responsibilities:

As a member of the **R&D team**, you will contribute to the development of the Cytomine platform (Open Source and Proprietary versions). You will be responsible for the **front-end** development and will be in front-line of exciting innovations. You have a "*solution driven*" mind that allows you to find innovative solutions for new opportunities. As an **Open Source** actor, you will also manage the related Open Source repositories and be responsible for the integration of the submitted pull requests.

Your main responsibilities are:
- Participate in projects from requirements analysis to quality assurance.
- Design, develop and improve UI features for the Cytomine software.
- Remain at the cutting edge by keeping a technology watch into these domains in collaboration with our researchers community.
- Design new products in a REST environment for specific customers.
- Actively participate in team meetings as an actor of innovation within the company.
- Keep focus on software quality (tests, documentation, ...) and report work evolution on regular basis.

Profile:

- Master degree in any topic related with Computer Science. Experience and/or knowledge in Medical Informatics, Bio-engineering/Biomedical Sciences or equivalent is an advantage. Minimum 2 years of experience.
- Experience in modern JavaScript development technologies: **VueJS**, npm, Mocha.
- Able to work openly by **sharing** information and knowledge.
- Able to multi-task and to stay organized in a **dynamic** work environment.
- Share the values of Open Source, Open Access and Open Science.
- Solutions, quality, innovation and results oriented, with good communication skills.
- Being passionate, **enthusiastic**, self-motivated, team player, hands on, autonomous and flexible.
- Professional proficiency in English.

Offer:

- A diversified and challenging position within a dynamic team in a leader company.
- The opportunity to enter a med tech company with **high social impact**.
- Varied contacts with professionals on an international scale.
- Significant learning and evolution opportunities.
- An attractive salary package coherent with your experience.
